PATRICK DAVID • Product & Experience Design Leader
Matawan, NJ • pat@patdavid.com • My portfolio

Professional Summary

Over 20 years of expertise in customer experience design, agile product development, and UX strategy, now integrating AI across the product lifecycle. Proven success in leading cross-functional teams to deliver end-to-end digital journeys, optimize customer satisfaction (NPS/CSAT), and drive business outcomes. Adept at leveraging data analytics, user research, design thinking, and AI tools such as Claude and Claude Code to prototype rapidly and ship working products (see Selected Projects), and to inform and evolve digital products. Experienced in financial services, healthcare, and technology sectors.

Core Competencies

- Strategy & Delivery: Digital CX Strategy & Optimization, Agile Product Delivery & Backlog Management, Stakeholder Engagement & Communication
- Research & Design: Customer Journey Mapping & Personas, UX Research & In-Market Testing, Data-Driven Design & Analytics (NPS, CSAT)
- Accessibility & Compliance: ADA, Section 508, WCAG
- Tools: Figma, Miro, CoPilot, Claude, Claude Code, ChatGPT, GitHub, Microsoft 365, JIRA, Confluence, Sketch, Adobe Creative Suite, Tableau, Power BI, Anaplan
- Technical: HTML, CSS, SQL, DAX, Bootstrap, Drupal, WordPress, Adobe Experience Manager (AEM)

Professional Experience

Prudential – Newark, NJ — **Manager, Experience Design** | 2022–Present

- Led CX initiatives across four agile teams, driving improvements in digital customer journeys and report-building processes.
- Led full-lifecycle UX research for a new intranet and mobile app pilot (surveys, 1-on-1s, a 50+ user live usability session), delivering prioritized findings that drove development refinements.
- Designed a new architecture in Miro, saving 15 hours per user and improving morale.
- Integrated generative AI and Microsoft 365 Copilot into agile development and reporting.
- Partnered with Accessibility team to ensure ADA compliance across digital products.
- Created and maintained technical documentation and user guides, reducing onboarding time from one month to several days.
- Collaborated with product owners and engineering to prioritize backlog and deliver roadmap enhancements.

Maximus – Princeton, NJ — **Front End Development and UX Lead** | 2020–2022

- Directed UX design team on Medicaid and Medicare enrollment platforms, recognized by IRS and State of Illinois for excellence.
- Conducted journey mapping and design thinking workshops with stakeholders.
- Partnered with UX researchers to find enrollment pain points, then streamlined the Medicare application, immediately raising completion and cutting drop-offs and call center volume.
- Migrated the DX-Hub platform from Drupal to AEM, accelerating state onboarding.
- Built design systems and ensured compliance with federal accessibility standards.

Integrichain – Philadelphia, PA **Lead User Experience Designer** | 2014–2020

- Led and mentored a junior UX designer and a UX researcher through research, whiteboarding, wireframes and Sketch comps.
- Spearheaded iterative UX design and research for pharmaceutical data platforms.
- Facilitated Product User Council sessions to gather feedback and inform roadmap priorities.
- Developed, deployed and maintained corporate UX design system.
- Delivered high-fidelity prototypes and led internal/external UX training sessions.

Bowker – New Providence, NJ **Senior User Experience Designer** | 2007–2014

- Led collaborative planning sessions with product and development teams to design site architecture, user flows, and facilitate passive and active user testing with the NYC Department of Education.
- Managed A/B testing and page performance evaluations using Google Content Experiments.
- Delivered HTML templates and production-ready graphics for iPhone and Android devices and designed custom themes for Drupal CMS.

Oppenheimer & Co. Inc. – New York, NY **Art Director** | 1999–2006

- Led design team responsible for the launch of online trading platform **buyandhold.com**
- Web designer, and development lead on redesign of corporate website, **opco.com**

Selected Projects

Four live products designed and shipped with Claude Code, each building on the last: Run to Your Bets → Playoff Beard → Backyard & Trail → Dino Tracker

Dino Tracker **Designer & Product Lead** | 2026 • Live site • Case study

A field guide to deep time: enter any place on Earth and see the dinosaurs and prehistoric life found there, from live Paleobiology Database records.

- Combined what the earlier projects proved: location search and offline use from Backyard & Trail, and the news collector from Playoff Beard.
- Art-directed 571 paintings with generative AI in Figma, held to one house style; every non-bird dinosaur across 11 featured locations has its own painting.
- Translated dense scientific records into a plain-language experience: place search, a world map, dinosaur search, and a 5-era timeline simplified from a 12-period design.
- Extended the news collector to merge coverage from up to 59 outlets into one story, match stories to the animals they name, and add curated videos.

Earlier in the series

- Backyard & Trail (Case study) – Finds the dangerous plants, wildlife and fungi recorded near any trail or ZIP code, from iNaturalist data; works offline. *Introduced location search, maps and offline use.*
- Playoff Beard – Live sports news for four leagues, tagged by team and refreshed hourly. *Turned the data pipeline into a news collector.*
- Run to Your Bets – NHL first-period stats and odds, refreshed automatically from public APIs. *Built the automated data pipeline the others grew from.*

Education

Pratt Institute
Bachelor of Fine Arts, Illustration | 1994
